

Bhuwan Paneru

Computer Engineering Graduate · Internship Candidate
panerubhuwan12@gmail.com | +977 9869915306 | Dadeldhura, Nepal

Computer Engineering graduate with hands-on experience in Android development, C#/.NET, Spring Boot, and hardware prototyping. Completed QA training with practical skills in manual testing, Postman API testing, and Selenium WebDriver (Python). Eager to apply skills in a real-world engineering environment, with a strong interest in QA, backend development, and system engineering.

EDUCATION

Bachelor's in Computer Engineering

Mar 2022 – Mar 2026

National Academy of Science and Technology (NAST), Dhangadi

- Coursework in data structures, databases, system design, and software engineering. Built multiple full-stack and hardware projects with strong interest in backend and system engineering.

QA TRAINING

Software Quality Assurance

May 2026 – June 2026

Code IT

- Core QA concepts: SDLC/STLC, test case design, bug life cycle, and defect reporting.
- Manual Testing: wrote and executed test cases covering functional, regression, and boundary value scenarios.
- API Testing: tested REST endpoints with Postman – verified status codes, response bodies, and edge cases.
- Selenium WebDriver (Python): automated browser-based UI tests using the Page Object Model (POM) pattern.

PROJECTS

Computer Laboratory Management System

C# · .NET · SQL

Desktop Application

- Built a desktop app to manage lab inventory, student records, and usage logs with SQL-backed authentication.
- Automated manual tracking processes, significantly reducing administrative overhead.

Radar Detection System

Arduino · Sensors · Hardware

Hardware Prototype · Team Project

- Assembled a radar prototype using ultrasonic sensors and a microcontroller with real-time alert mechanism.
- Validated distance detection accuracy through systematic testing across multiple ranges.

Result Processing System

Spring Boot · Java · REST API

Web & Mobile Application

- Built a Spring Boot REST API backend for storing and retrieving academic results across web and mobile clients.
- Designed the full data model and business logic for end-to-end result processing.

TECHNICAL SKILLS

Android Dev · C# / .NET · Spring Boot · SQL · GitHub

SOFT SKILLS

Communication · Teamwork · Problem Solving · Eagerness to Learn

LANGUAGES

Nepali (Native) · English (Professional)
