BHUWAN PANERU

Computer Engineer · Aspiring Cybersecurity Analyst

panerubhuwan12@gmail.com +977 9869915306 Kathmandu, Nepal

ABOUT ME

Computer Engineer with foundational training in Security Operations (SOC) and web application security. Familiar with SOC workflows, SIEM concepts and Wazuh, and common web vulnerabilities (OWASP Top 10), with lab practice using Burp Suite, Nmap and Metasploit. Background in software development and QA testing (Java/Spring Boot, C#/.NET, Postman, Selenium). Seeking an entry-level SOC Analyst or Junior Penetration Tester role to build practical, real-world skills.

SKILLS

- **SOC concepts:** SOC workflow, SIEM basics, log analysis, alert triage, escalation, IOC/IOA, TTPs
- **Web security:** OWASP Top 10, XSS, SQL injection, CSRF, SSRF, IDOR, command injection, access control; recon basics (OSINT, Google dorking, subdomain, port and service enumeration)
- **Lab exposure:** Wazuh, Burp Suite, Nmap, Metasploit, Wireshark, OWASP ZAP, Nikto, Kali Linux, VirusTotal
- **Fundamentals:** TCP/IP, TLS, Windows Event IDs, Active Directory, Linux, CVE / CVSS
- **QA & Testing:** Manual Testing · Postman (API Testing) · Selenium WebDriver (Python) · Test Case Design · Bug Tracking
- **Development:** Android Dev · C# / .NET · Spring Boot · SQL · GitHub

EDUCATION

Bachelor's in Computer Engineering *Mar 2022 – Mar 2026*
National Academy of Science and Technology (NAST) · Dhangadhi

- Coursework in data structures, databases, system design and software engineering; built multiple full-stack and hardware projects.

Intermediate in Science (+2) *2018 – 2020*
Aishwariya Vidhya Niketan · Dhangadhi, Kailali

Secondary Education Examination (SEE) *Passed out: 2017*
Dadeldhura

APPRENTICESHIP

Cyber Security Apprentice — SOC, Ethical Hacking & Bug Bounty *July 2026 – October 2026*
Sill Shikhya

- Learned SOC fundamentals: monitoring workflow, SIEM, alert triage, escalation and reporting; set up Wazuh in a lab, created agents and built dashboards.
- Worked through PortSwigger Web Security Academy labs on XSS, OS command injection, access control, authentication and CSRF using Burp Suite.
- Practiced on DVWA across security levels: brute force, command injection, CSRF, XSS and SQL injection.
- Practiced recon and enumeration with Nmap, subfinder, ffuf and Gobuster; ran vulnerability scans with Nikto, Nuclei and ZAP.
- Tried Metasploit against a Metasploitable VM in a controlled lab, and introduced to malware analysis with VirusTotal and ANY.RUN.

PROJECTS

Result Processing System | Spring Boot · Java · REST API · Web & Mobile

- Built a Spring Boot REST API backend for storing and retrieving academic results across web and mobile clients.
- Designed the full data model and business logic for end-to-end result processing.

Computer Laboratory Management System | C# · .NET · SQL · Desktop Application

- Built a desktop app to manage lab inventory, student records and usage logs with SQL-backed authentication.
- Automated manual tracking processes, significantly reducing administrative overhead.

Radar Detection System | Arduino · Sensors · Hardware Prototype · Team Project

- Assembled a radar prototype with ultrasonic sensors and a microcontroller with a real-time alert mechanism.
- Validated distance detection accuracy through systematic testing across multiple ranges.

SOFT SKILLS

Communication · Teamwork · Problem Solving · Analytical Thinking
